Add
dish soap

Add
bait
(NOT included)

Add 1/4 cup liquid

For use with BioCare Fruit Fly, Yellowjacket or Fly lures. You can also make your own bait by adding 1/4 cup fruit juice, dime size portion of bait (fish, meat or cat food) and 2 drops dish soap. For Fruit Flies add 1/4 cup apple cider vinegar and 2 drops dish soap. Remove lid and SLIGHTLY TILT jar. Pour liquid in so it runs down the inside of jar. REPLACE LID. Insects enter from the bottom. Hang the trap securely away from food areas and out of reach of children and pets. Traps can also be placed on a table. Rinse and rebait the trap when full of insects or every 2-3 weeks. Traps work best in warmer weather.

Place trap out of reach of children and pets.
Do not place trap in dishwasher.
