 Manufactured by Mighty Plant, Inc. in the USA

Instant Compost Tea

Instant Compost Tea is the first & original compost tea that requires no brewing. Our water soluble powder creates a tea with a beneficial microbe density that could never be achieved in traditionally brewed teas. In addition to being more potent than traditional Teas, our patent pending Instant Compost Tea recipe is far more sanitary; containing only plant beneficial microbes, amino acids, kelp, yeast, peptides and never any filler. Add water, stir and it's immediately ready for use.

When Mighty Plant Instant Compost Tea is activated with water, the 4 species of bacteria react with selected amino acids, converting them into plant beneficial compounds with these powerful benefits

Application methods

- ▶ Hydroponic Systems
- ▶ Inject Into Irrigation Lines
- ▶ Apply Dry To Soil
- ▶ Root Drench
- ▶ Foliar Spray

CONTAINS NON-PLANT FOOD INGREDIENTS
