

Jackson Trap – ASSEMBLY & USE

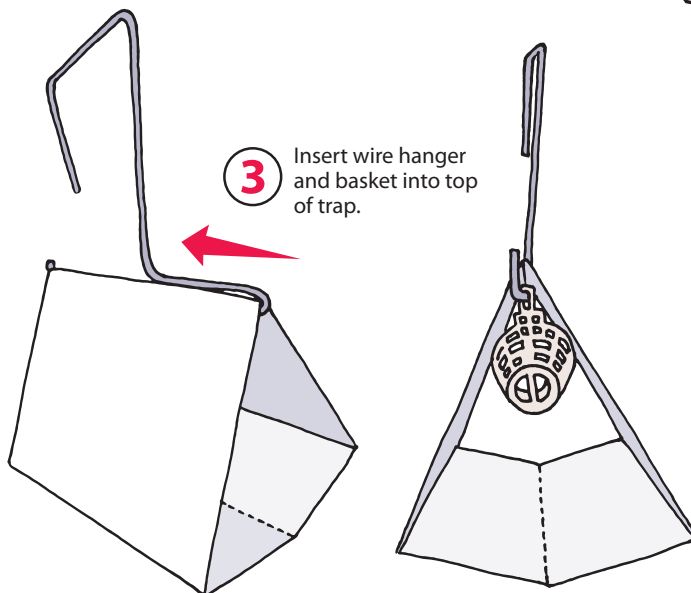

Item List: Trap • Basket/Lure Clip • Insert (CAUTION: STICKY) • Wire Hanger

1 Open the body of the trap to form a triangular shape.

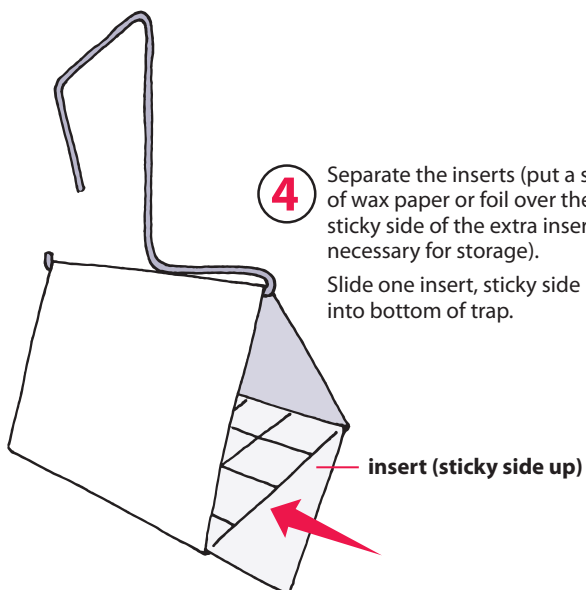

2 Open foil packet and remove the lure (avoid touching dispenser membrane surface with fingers). Place lure in basket. Slide basket onto wire hanger as shown.

3 Insert wire hanger and basket into top of trap.

NOTE: To prolong storage life, refrigerate or freeze unused dispensers in their foil packet. Use of tweezers or rubber gloves is recommended for handling dispenser to avoid contaminating dispenser, especially if traps are prepared for more than one insect.

4 Separate the inserts (put a sheet of wax paper or foil over the sticky side of the extra insert if necessary for storage). Slide one insert, sticky side up, into bottom of trap.

5 Hang trap in tree or attach securely to a stand. Replace inserts when dirty or when covered with insects.

For use in monitoring:
Brown Marmorated Stink Bug
Mediterranean Fruit Fly
