

**ProBio Balance Original™** is a concentrated liquid blend of probiotic cultures produced through a natural fermentation process. These cultures, when introduced into any living system, promote the growth of naturally occurring beneficial microorganisms to achieve a healthy microbial balance.

**ProBio Balance Original** is a cost-effective, environmentally safe, all-natural product used in a variety of industries and applications. General usage guideline for activated product are:

- **Large-scale food composting** – provides odor control and accelerated composting when sprayed on compost at a rate of 1-3 liters per ton of compost material. Dilute ProBio Balance Original with water as needed.
- **Indoor composting** - Dilute at a ratio of 1:10 with water and apply every two weeks
- **Commercial/Residential Odor Control** – provides odor control caused by mold, mildew, smoke or pets when sprayed on the affected areas at a rate of 1:10 – 1:100. W415-X4
