

# NATURAL CATCH®

## FRUITFLY TRAP

Natural Catch® controls fruit flies (*Drosophila*) with an innovative trap which is safe, nontoxic and easy-to-use. The convenient container is safe for use anywhere fruit flies are a problem: kitchens, countertop, display cases, and dining areas. Natural Catch® comes complete and ready-to-use.

### Directions:

1. Write the date you activate Natural Catch® on the bottom of the trap. Natural Catch® is effective for 30 days or longer.
2. Gently pierce **ALL four** openings of the Natural Catch® with the stick provided. The stick opens the trap just the right amount for maximum effectiveness.
3. Place the Natural Catch® wherever fruit flies are a problem: countertops, kitchens, display cases and dining areas.
4. Occasionally inspect the trap entrance and keep it free of debris. The trap is safe to use around food and the attractant is nontoxic and pesticide-free.
